  Secondary | **Percentage: 85.42** — Jan 2012 – June 2018

Technical Skills

- **Programming Languages**: **Java, JavaScript**

- **Frontend Technology : ReactJS , Tailwind , Bootstrap, HTML , CSS**

- **Backend Technology : NodeJS , Express**

- **Database**: **MySQL , MongoDB**

Projects

- **News WebApp**

  React, Bootstrap, News API , JavaScript, HTML, CSS
  - Developed a responsive **news aggregator web application** that allows users to view news articles from various categories such as Entertainment, Sports, Business, etc.
  - Managed state and handled asynchronous data fetching using **React Hooks** (e.g., **useState**, **useEffect**).
  - Integrated **News API** to fetch real-time news data across multiple categories.
  - Designed a responsive UI with **Bootstrap** components, ensuring **cross-device compatibility**.
  - Live Preview : https://news-app13.netlify.app/

- **Image Background Remover**

  React, Tailwind, ExpressJS , Mongoose, Multer , Clerk
  - Developed a **full stack** web application that removes the background from images .
  - Ensured smooth backend processing with **Express.js** for optimized performance.
  - Utilized **Multer** for handling image uploads and **Mongoose** for database management.
  - Implemented user authentication and management using **Clerk** for secure access.
